

MF68...2050 Butterfly Valve Actuators

(MF68, MF200, MF550, MF700, MF1450, MF2050)

Features

- Hand wheel for manual operation as standard
- Adjustable start/end point switch
- 2 additional auxiliary switches as standard
- Terminal connection
- Direct fit without any linkage kits
- Optical position display
- Suitable for outdoor and industrial environments (IP65)
- Very low maintenance
- Self-regulating heater to prevent condensation buildup within the actuator
- Adjustable positioning speed, 60 sec...360 sec (modulating models)
- Control signal sensitivity adjustment (modulation models)
- 0...10V Position Feedback (modulating models)

Overview

The MF68...2050 is a heavy duty series of electric actuators for use with the VF209W and VF299W butterfly valves.

The series comprise 6 key actuator models between 68 Nm and 2050 Nm of torque to efficiently and reliably drive the valve between fully open and tightly closed.

Actuators are available for 2 position (On/Off), 3 point floating and modulating control signals.

Two position and floating is provided from the same base actuator and available in either 24 Vac or 230 Vac models.

Modulating models offer precise position of the butterfly disc for good proportional media control. All modulating models have position feedback.
